the incredible baron steam. the incredible baron. the incredible adventures of baron von munchausen

Pretty fun 3rd generation fighter, despite not being as capable as many other planes in this game. I mainly like to fly this for bombing and strike missions, but with some practice you can also fly this plane like an air dominance fighter. This plane is especially fun in low level, high speed flying in VR. This plane is fairly simple due to the fact that it is so old, and so the learning curve is pretty small compared to other planes in DCS.. Naive twins (not really) run a farm (barely) and are so far in debt that they exchange sexual favors for firewood and store coupons. Amazing English translation. XD

Better played with the R18 patch.. Just shortly into the game so far and it seems like an early access game alright, unless I need to come back to edit this review later it has a ways to go. However, imagine Space Engineers, with the design style of Subnautica, super sleek interfaces, and a level of immersion that'll throw you off - literally - when you careen into orbital debris without anything actually touching your real body. I'll definitely be getting further into this game, and I expect I'll be sinking a lot of time into it.. this crap I've un-installed and re-installed and it still does not work, has the person that wrote this game ever played darts, the AI plays 8 darts to my 2.5 darts, that when it lets you pick up the darts to start with!!!!. quite enjoying it so far, I can see where gameplay can get repetitive pretty quick, hope the devs haven't given up on this one. It's a pretty straight forward tycoon game, buy stuff to make party goers happy, get money, repeat. I'm looking forward to spending more time with it.

This game seems like it has a lot of potential. The problem is the framerate unfortunately. the 4 FPS game over screen has been my best friend recently because i have seen it soo much im already used to it lel.. Gold Rush! Anniversary is a game that I recommend because:

- it has a good price
- it is a good point &click
- the graphics are good
- it is atmospheric
- it has strategy
- it has a good concept
- it has trading cards

Enjoy!. It's awesome to yell stuff and it does stuff for you, like open browser and stuff. Great improvement in my top graphic games (almost everything ULTRA at 60 fps in ARMA 3, GTA 5, The Witcher 3... little drops to 55-50) with an I7 4790k, nvidia gtx 970 and 16 gb RAM. Now I don't have lag anymore.

PC Security seems ok, but don't enough time to mess in it.

Great software.. **Update:**

**Left side got fixed, and I suppose the right side was the lesser evil of the two paths to start with. Good enough to thumb it up instead of thumbing down. :P**

**I still do wish the missile textures were changed, though.**

**Old:**

**The first two upgrades on either side are alright, but for 3rd and 4th on either side it just gives it a different rotating stand. It would be a whole lot better if the bomb/missile textures themselves changed.**
