In India, there are lots of TV channels and . This book is the reference book for all those who need to crack the TNPSC Group 2 General Tamil Preliminary Exam. This book will help them in making a study plan for the upcoming TNPSC Group 2 General Tamil Preliminary Exam. The science behind physics does not have the answer for everything. Though the answers to some questions are known, yet there are also some questions which have no clear answer. These are the things which we call as "mysterious" or "supernatural" because there is no scientific reason behind it. Now, in this chapter, we will talk about some supernatural phenomena which are currently being witnessed by people across the world. So, here are some "mysterious" and "supernatural" phenomena, that you might have heard about in your science class. 1. Mermaids, mermen, and ghosts {#sec1-1} ===== > .. So, the most important questions are: "If ghosts, mermaids, mermen, and

dragons are all a part of the same "Universe", then which of the four are actually real?" The answer to this question is: "They're all real, and they're all part of the same Universe. And it's the same Universe that we are all part of. So in a sense, they're all real. And the way you know this is because the people who believe in them are all part of the same Universe. So, if the people who believe in ghosts are part of the same Universe as the people who don't believe in ghosts, then surely, the people who believe in ghosts must be part of the same Universe as the people who don't believe in ghosts. So, if all of them are part of the same Universe, then all of them must be real."...which is true. The only thing is that you might have different definitions of what "Universe" means, and that's okay. Because "Universe" doesn't necessarily mean all the universes that there are. It could mean all the universes that there are in the world we experience. So, we'll leave that part to the philosophers and scientists to fight it out. \... in a sense, all of these are real, and we are all a part of the same Universe." 82157476af
